

Firevault Fact Sheet – September 2025

Company Overview

Name: Firevault Limited

Category: The world's first **secured offline data platform**

Tagline: Firevault -Disconnect to Protect™

Founded: 2025

Headquarters: London, UK

Positioning:

Firevault is a British cybersecurity company that created the secured offline data platform. Its architecture is built on three principles: Controlled Connectivity, Secured Data Access, and Secured Offline Data. Not cloud. Not HSM. Not SaaS. Firevault is offline by design.

Platform Categories

- **Vault — Secured Offline Digital Vault**
Digital safety deposit box for directors, shareholders, family offices, and professionals. Protects board papers, contracts, financial records, identity documents, investments, and archives.
- **Storage — Scalable Secured Offline Storage**
Enterprise-scale resilience for intellectual property, customer data, and operational systems. Provides the “0” in the 3-2-1-0 model — the offline, unreachable layer.
- **Platform (FV-PaaS) — Secured Offline Access and Asset Control**
Modular, offline-first platform with nine dedicated offline modules. Enables sovereign-grade, multi-site deployments across governments, enterprises, and critical infrastructure.

Key Facts & Figures

- **26 billion** files stolen globally in 2024 (≈11,000 every second).
- **£3.29m** average UK breach cost (IBM, 2025).
- **\$10.22m** average US breach cost — highest globally (IBM, 2025).
- **SAR 27m** average breach cost in the Middle East (IBM, 2025).
- **54%** of online data classified as sensitive (Thales, 2025).

Approved Quotes

- *“If it's offline and disconnected, it can't be scanned, stolen, or ransomed.”* — Mark Fermor, Co-Founder
- *“For security professionals, Firevault is a platform you can adopt or resell. It delivers proof, not promises.”* — David Bailey, Co-Founder

Upcoming Events

- **Connected Britain 2025** (London, September) – Live demonstrations
- **International Cyber Expo 2025** (London, September) – Global showcase
